

PLEASE! Please do not implement any proposal that would lessen Indiana's Telephone Privacy Law protections.

After signing on for NO CALLS, we rarely have interrupted dinner times. We now know that we can answer the phone without being harrassed about buying something that we don't need. If we want to purchase something, we do our research and then purchase on-line, catalog or at store. Many of the telemarketers were rude to us when we asked to be removed from their list - but even having to do that is an intrusion into our time at home.

In today's busy society, it is so nice to have at least a little peace when at home. Eventhough we don't like the "junk" mail that comes in, we can toss it at our convenience.

Now, if you could do something about eliminating "spam" mail - we would be delighted!

Again, please continue to allow those of us in Indiana to continue to be on the "no-call" list. It has been such a blessing to us!

Thank you for your attention to this.

J Kay Crabtree
